Sure, here is another example of a translated equation from the document:

Equation 1 in Spanish:[1]

e -> f -> imm -> ce -> cf -> cp -> manto -> ceta -> ceta -> volar -> flotar -> límite_agua <- transición-límite -> agua_límite magmus solar es solar
 magmus niebla es claro => organismo_plano -> neuro(lim, grth) -> masa -> sudor NxN -> multi -> hombre -> sustancia -> colonia -> Pong-a-Tierra x-x
 [punto-convergencia NxNxNxN coeU.]

Explanation:

This equation is a translation of the Genesis Equation 1 from English to Spanish. It uses the same symbols and logic as the original equation, but the words are replaced by their Spanish equivalents. For example, e means energy or the Spirit of God, f means force or light, imm means immensity or sky, ce means creation or earth, cf means growth or vegetation, cp means power or stars, etc[2]. The sign <- means a backward movement or a separation, the sign => means a consequence or an implication, and the sign x-x means an opposition or a conflict[3][4]. The equation represents the process of creation according to the Bible, from the flat shape to the human shape, through the separation of the waters, the evolution of living organisms, and the collision between the earth and another celestial body[5].
